WEDA B680

WEDA B680

The Weda B680 is a very powerful cleaner for cleaning operations in mid-size to large pools or for pools and aquatic parks with large numbers of swimmers. The B680 is based on the Weda B600 and has been equipped with an ergonomical handle which simplifies eventual needs for lifting the cleaner from the pool. The B680 is equipped with a safety transformer that brings safe 42 V to the cleaner. The strong suction of this cleaner allows for wall cleaning.

The Timer function enables the operator to delay the start of the cleaner so that the sediment in the pool has had time to settle on the bottom. The timer also allows for setting of the running time for the cleaner. The rotating brushes release the bottom sediment and moves it towards the suction hole under the bottom plate of the cleaner. The powerful pump pumps the water through the collecting filter bags or through a discharge hose to the main filters of the pool or to waste.

Standard equipment

Trolley with built-in safety transformer
Double filterbags 120 micron
Double protection bags
Double rotating brushes
Power supply cable, 10 meters
Cable for remote control, 25 meters
Umbilical (floating cable), 40 meters

Optional equipment

Radio remote control / Timer
Filter bags 70 or 200 micron
Discharge hose connection 2"
Discharge hose 2 " 50 meters
Fixed spring loaded brush (algae brush)
Free stream impeller
Flexible bumper bar for continuous operation
Umbilical (floating cable) 41 to 60 meters

Technical data

Weight in air:	approx. 49 kg
Weight in water:	approx. 5 kg
Dimensions (LxWxH):	86 x 60 x 70 cm
Suction width:	60 cm
Suction capacity:	1200 liters/minute
Variable speed in manual mode:	0,2 and 0,4 meters/second
Speed in automatic mode:	0,2 m/second
Mains voltage 3-phase, 50/60Hz:	205/230/400 V
Operating voltage:	42 V
Max. power output	2,5kW

About WEDA

Weda was founded in 1919 and has grown into one of the leading companies in the pool cleaning market. Weda today offers cleaners for basically all sizes and shapes of public pools, indoor and outdoor. The product program includes also larger cleaner for industrial applications in Water works, nuclear power stations and industrial basins and reservoirs in a wide range of markets. Weda is marketed worldwide through own subsidiaries and distributors and partners.
