

WEDA W50

STANDARD - AUTOMATIC

Weda W50 is a compact cleaner with a high cleaning capacity, with rotating brushes and a pump that delivers 600 liters per minute. It can be equipped with a discharge hose outlet for removal of all sedimentation independent of size. The W50 comes in two versions:

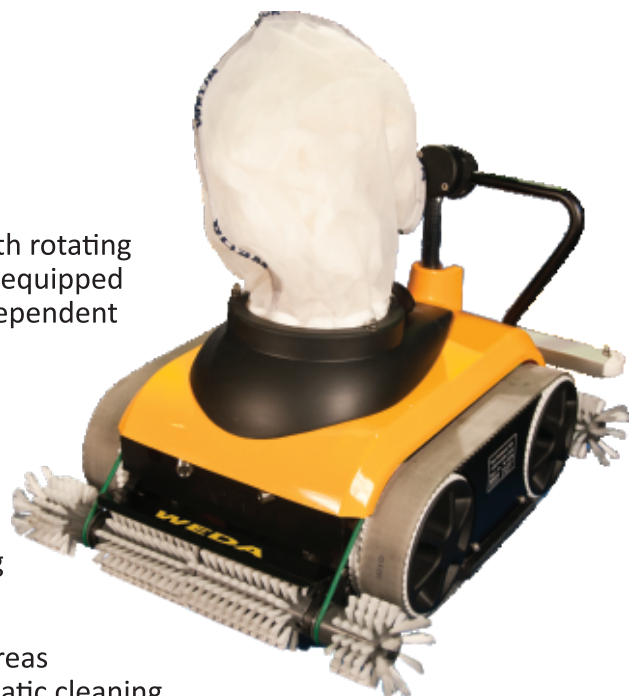

W50 Standard

- for rectangular pools

W50 R

- a completely automatic cleaner which calculates its turns during operation.

Both versions can be controlled with a radio remote control for areas hard-to reach. The new laser sensor design allows for fully automatic cleaning with no moving parts for the control functions. As with all Weda cleaners the W50 is based on an electrical submersible pump with a high resistant aluminium impeller to safeguard reliable cleaning and removal of larger particles frequently found in pools.

Standard equipment

The W50 cleaning unit
Control box
Filter bag 120 micron
Power supply cable, 2 meters
Radio remote control
Umbilical (floating cable), 30 meters

Optional equipment

Trolley
Beach control- makes the cleaner turn back if it travels out of water
Discharge hose connection 2"
Filter bag 50 micron.
Umbilical (floating cable), 40 meters

Technical data

Weight in air:	approx. 28 kg
Weight in water:	approx. 12 kg
Dimensions (LxWxH):	65 x 50 x 30 cm
Suction capacity:	600 l/minute
Speed in automatic mode:	0,2 m/second
Mains voltage 1-phase	
50/60Hz:	110/230 V
Max. power output:	1.1 kW

Our business - underwater cleaning technology

WEDA offers a wide range of cleaners for small and large drinking water reservoirs, various types of filters and sedimentation basins. WEDA, formed in 1919, is a Swedish company with headquarters in the town of Södertälje, south of Stockholm. WEDA products are available worldwide through a global network of distributors and Weda subsidiaries in the US and Germany .
