# WEDA B600

## WEDA B600

The Weda B600 has been the flag ship in the Weda range of cleaners since 1981. It has over the years been upgraded with new electronics and material to meet the demands in the changing pool market with various sizes and shapes of pools. It has been the selected cleaner in several Olympic games.

The B600 is delivered with a trolley with a built-in safety transformer that supplies safe 42 V to the cleaner. The B600 remains one of the largest and most efficient cleaner on the pool market. An excellent cleaner for the tough cleaning jobs. The strong suction enables the B600 also to be used for wall cleaning. The weight of the B600 is only 7 kilograms under water and in most pools the cleaner can be driven out of the pool and onto the trolley.

It can be used in fully automatic mode and/or controlled by remote control when required. The base of the cleaner is the very powerful pump in combination with the rotating brushes. After all it is the cleaning capacity that is the most important factor.

### Standard equipment

Trolley with built-in safety transformer  
Double filterbags 120 micron  
Double protection bags  
Double rotating brushes  
Power supply cable, 10 meters  
Cable for remote control, 25 meters  
Umbilical (floating cable), 40 meters

### Optional equipment

Radio remote control / Timer  
Filter bags 70 or 200 micron  
Discharge hose connection 2"  
Discharge hose 2 " 50 meters  
Fixed spring loaded brush (algae brush)  
Free stream impeller  
Flexible bumper bar for continuous operation  
Umbilical (floating cable) 41 to 60 meters

### Technical data

Weight in air:	approx. 52kg
Weight in water:	approx. 7kg
Dimensions (LxWxH):	86 x 60 x 30 cm
Suction width:	60 cm
Suction capacity:	1200 liters/minute
Variable speed in manual mode:	0,2 and 0,4 m/sec
Speed in automatic mode:	0,2 m/second
Mains voltage 3-phase, 50/60Hz:	205/230/400 V
Operating voltage:	42 V
Max. power output	2,5kW

### About WEDA

Weda was founded in 1919 and has grown into one of the leading companies in the pool cleaning market. Weda today offers cleaners for basically all sizes and shapes of public pools, indoor and outdoor. The product program includes also larger cleaner for industrial applications in Water works, nuclear power stations and industrial basins and reservoirs in a wide range of markets. Weda is marketed worldwide through own subsidiaries and distributors and partners.
